NOAA Technical Memorandum NMFS

The National Oceanic and Atmospheric Administration (NOAA), organized in 1970, has evolved into an agency which establishes national policies and manages and conserves our oceanic, coastal, and atmospheric resources. An organizational element within NOAA, the Office of Fisheries is responsible for fisheries policy and the direction of the National Marine Fisheries Service (NMFS).

In addition to its formal publications, the NMFS uses the NOAA Technical Memorandum series to issue informal scientific and technical publications when complete formal review and editorial processing are not appropriate or feasible. Documents within this series, however, reflect sound professional work and may be referenced in the formal scientific and technical literature.

NOAA Technical Memorandum NMFS

This TM series is used for documentation and timely communication of preliminary results, interim reports, or special purpose information; and have not received complete formal review, editorial control, or detailed editing.

SUMMARY OF DISTRIBUTION RECORDS OF THE SPINNER DOLPHIN,
STENELLA LONGIROSTRIS, AND THE PANTROPICAL SPOTTED
DOLPHIN, S. ATTENUATA, FROM THE WESTERN PACIFIC
OCEAN, INDIAN OCEAN AND RED SEA

J.W. GILPATRICK, JR., W.F. PERRIN, S. LEATHERWOOD AND L. SHIROMA

INTRODUCTION

Spinner and pantropical spotted dolphins inhabit tropical and sub-tropical ocean waters worldwide. Their distributions are well described for the eastern Pacific (Perrin et al., 1983) and for the Hawaiian islands (Norris and Dohl, 1980). Distribution records for the western Pacific (west of 160° west longitude), Indian Ocean and Red Sea continue to accumulate slowly. This paper summarizes published and unpublished locality records available through 1986. It is part of an effort (the "Pacific Dolphin Project") to examine dolphin populations in the Central and South Pacific with the aim of determining relationships between these populations and those in the eastern Pacific that are involved in tuna fisheries (Holt, 1985).

MATERIALS AND METHODS

Evaluation of Data

The wide variety of sighting records that we included ranged from highly detailed morphological and behavioral descriptions to, at times, little more than the word "spinner" or "spotter" and a location. We did not edit the records for quality or reliability, but rather took them at face value.

Sources of Unpublished Data

A variety of unpublished documents were consulted. The sources included cruise reports for National Oceanic and Atmospheric Administration (NOAA) research vessels, sighting records taken by marine-mammal observers aboard various seagoing "vessels of opportunity" (see App. Table 1-2), photos and personal correspondences. Appendix 1 is a catalog of the unpublished sources.

Museum Specimens

Museum specimens have been collected from most regions of the study area. Appendix 2 is a summary of museum and other collection specimens for which the localities are included in this summary.

Distribution Database

The data from all the distribution records were transcribed to a "Locality Record" form. The data were then entered into a computerized database ("Dolphin Distribution Database") maintained at the Southwest Fisheries Center (SWFC). As new locality information becomes available, it will be recorded and appended to the database. Appendices 1 and 2 are reports derived from the database.

RESULTS

In the western Pacific and Indian Oceans, the spinner dolphin and pantropical spotted dolphin range from about 37° North latitude to about 35° South latitude (Figs. 1 and 2) in warm waters. Their distributions are more or less continuous from the western Pacific into the Indian Ocean and Red Sea. A pantropical spotted dolphin specimen (USNM550771) found in Alaska represents the only "extralimital record" (Perrin et al., 1987).

Distributional gaps are apparent in open-ocean areas away from land and island groups. This lends support to the notion that both dolphins are usually associated with coastal waters, islands and shoal areas (Norris et al., 1985). An exception is the eastern tropical Pacific, where most populations are oceanic (Perrin et al., 1983). Oceanic sightings do occur in other areas, however, and the distributional gaps, to some extent, may be artifacts of minimal sighting effort in open-ocean areas.

ACKNOWLEDGEMENTS

The authors thank the following people for contributing unpublished data: Robert L. Pitman, John R. Henderson, Jack Grove, Marjorie Y. Crosby, Grant Abel, William H. Dawbin, G. E. Heinsohn, the late Durant Hembree, W. J. Houck, Alan Olson, Toshio Kasuya, P. Lamberson, Didier Marchessaux, Helene Marsh, Senzo Uchida, C. Peters, James G. Mead, and William-Smith Vaniz. Sachiko Tsuji translated Japanese articles into English, Roy Allen produced illustrations and Kathy Shere and Carrie Wilson provided logistic support.

We wish to thank John Carr and John Henderson for their review of this report.

Figure 1. Known distribution of Stenella longirostris in the western Pacific (west of 160°W. longitude), Indian Ocean, and Red Sea. Distribution east of 160°W. longitude from Perrin et al., 1983 (solid lines = known limit, dotted lines = uncertain limit). Circled numbers are approximate localities: 1, "Java Sea"; 2, "Marshall Islands"; 3, "within 70 kms of southeast Malaysian coast"; 4, "between 2°N. to 3°50'N. [and] 162°W. to 168°10'W."; 5, "very rare [from Wakayama to Miyazaki Prefectures]"; 6, "rare [from Fukuoka to Kagoshima Prefectures]"; 7, "Bangkok"; 8, "off Northern Australia"; 9, "South China Sea".

Figure 2. Known distribution of *Stenella attenuata* in the western Pacific (west of 160°W. longitude), Indian Ocean, and Red Sea. Distribution east of 160°W. longitude from Perrin et al., 1983 (solid lines = known limit, dotted lines = uncertain limit). Circled numbers are approximate localities: 1, "Madagascar"; 2, "Thailand"; 3, "Taiwan"; 4, "Banda Sea"; 5, "Northern Australian Waters"; 6, "Indian Ocean, between Ceylon [Sir Lanka] and equator"; 7, "India"; 8, "Seychelle Islands"; 9, "Arabian Sea"; 10, "Strait of Malacca"; 11, "Between East Cape and Kermadec Islands"; 12, "South China Sea".

Appendix Table 1.3 Distribution records received through personal communications.

1. Grant Abel of International Oceanaria Development Co., LTD.: photos and personal communication sent to Leatherwood in 1979, features spinner dolphins in the South China Sea.
2. Franklin G. Alverson of Living Marine Resources, Inc., San Diego, CA: letter of October 6, 1981 to Perrin describing dolphin sightings made by Frank Burns aboard the tuna seiner MV Island Princess during July and August. Another letter to Perrin describes dolphin sightings made by Jim Lambert aboard the seiner MV Leilani.
3. William H. Dawbin of the Australian Museum: photos and correspondence to Perrin concerning a spinner dolphin taken at Rabaul, New Britain in August of 1966. Another correspondence, with enclosed photos, show spinner dolphins riding a ship's wake on August 28, 1966 near Madang, New Guinea; another photo shows a spinner dolphin beached at Madang, New Guinea.
4. G. E. Heinsohn, James Cook University, Townsville, Queensland, Australia: photos of a stranded spinner dolphin from Cairns, Queensland, Australia sent to Perrin, photos taken September 21, 1971.
5. Durant Hembree, Dept. of Ports and Fisheries, Darwin, Australia: letter of August 19, 1985 to Gilpatrick describing spotted, spinner and bottlenose dolphins incidentally killed in the Taiwanese gill net fishery off northwestern Australia during the fall of 1984.
6. John R. Henderson, National Marine Fisheries Service (NMFS), SWFC, Honolulu, Hawaii: personal communication to Gilpatrick in March of 1987, described "resident schools" of spinner dolphins at Kure Atoll and at Pearl and Hermes Reef in the Hawaiian Islands.
7. W.J. Houck, California State University, Humboldt: letter and photo of a spinner dolphin from the Marshall Islands sent to Perrin in 1977.
8. Toshio Kasuya, Far Seas Fisheries Research Laboratory, Japan: letter of September 17, 1986, addressed to Perrin, listing sightings (made by Kasuya) of striped and spotted dolphins off Japan.
9. P. Lamberson: photos sent to Perrin in 1976 showing dead stranded and free swimming spinner dolphins at Enewetak Atoll.
10. Didier Marchessaux, Université de Provence Centre de Sainte-Jérôme, France: letter of April 25, 1980 to Perrin;

enclosed photos show spotted dolphins at New Hebrides Islands.

11. Helene Marsh, James Cook University of North Queensland, Australia: letter of January 15, 1986 and photo of spinner dolphins sent to Perrin; photo depicts spinner dolphins "bow-riding in the Swain Reef complex of the Southern Great Barrier Reef", photo was taken on November 27, 1985. Another letter with enclosed photos dated September 23, 1986 show spinner dolphins at Raine Island, Pandora Cay and Piper Island of the Great Barrier Reef; also noted is the live capture of spinner dolphins from Michaelmas Cay-Reef.
12. Alan Olson, NMFS, Tuna/Porpoise Mgmt. Branch, San Diego, California: described to Gilpatrick a sighting of a school of spinner dolphins (15 to 20) at Fagasa Bay, Pago Pago on June 4, 1986.
13. C. Peters; photos sent to Leatherwood depict spotted dolphins from Male Atoll, Maldives Islands, Indian Ocean.
14. Senzo Uchida, Okinawa Expo Aquarium, Japan: letter of February 11, 1980 to Perrin; photo enclosed shows a spotted dolphin which was taken to the aquarium "by a fisherman when (the dolphin) half-stranded at night" near Okinawa during a typhoon in September of 1979.
15. William-Smith Vaniz photographed a spinner dolphin from Yala, Sri Lanka on February 3, 1970. The photo was given to James G. Mead of the Smithsonian Institution who then forwarded the photo to Perrin.
16. Peter J. H. van Bree, Institut voor Taxonomische Zoologie - Zooloogisch Museum, Amsterdam, Netherlands: letter of September 23, 1986 to Perrin containing museum (ZMA) specimen data on spinner dolphins collected from Oman area.

APPENDIX 3. SPINNER DOLPHIN DISTRIBUTION DATABASE REPORT. The first digit of "SERIES NUM." denotes a geographic region: 0= Hawaiian Islands; 1= central Pacific Ocean (160° W to 160° E Long.); 2= southwest Pacific and east Indian Ocean (160° E to 95° E Long. and below 20° N Lat.); 3= northwest Pacific (W of 160° E Long. and north of 20° N Lat.); 4= near mainland India; 5= Seychelles, Maldives, and Amirantes Islands; 6= Sri Lanka; 7= West Indian Ocean, Red Sea, and Persian Gulf; 8=non-specific. "TYPE" record codes: "01"= sighting record; "02"=sighting and photo taken; "03"=photo; "04"= specimen exists; "05"= capture or whaling; "06"= fishery incidental take.

Appendix 5. Acronyms and abbreviations for museums and collections.

AMM	Australian Museum, Sydney
BUIT.MUSM.	Buitenzorg Museum
BMNH	British Museum (Natural History), London
COL. MUSM.	Colombo Museum, Sri Lanka
COL.OF SURG.	College of Surgeons, Sri Lanka
DOMIN.MUSM.	Dominion Museum, New Zealand
FM	Field Museum of Natural History, Chicago
LIZ	Institute of Zoology, Leningrad
MCZ	Museum of Comparative Zoology, Harvard University, Cambridge, Massachusetts
MNHN	Museum National d'Histoire Naturelle, Paris
MZB	Museum Zoologicum Bogoriense, Java
NARA	National Aquatic Resources Agency, Colombo, Sri Lanka
NSM	National Science Museum, Tokyo
NJNU	Nanjing Normal University, People's Republic of China
PEM	Port Elizabeth Museum, Port Elizabeth, South Africa
QUEENSLND.MUS.	Queensland Museum, Australia
RMNH	Rijksmuseum van Natuurlijke Historie, Leiden, Netherlands
SAM	South African Museum, Cape Town
TECH.INS.SWED.	Technological Institute, Norrkoping, Sweden
TKO	Ocean Science Institute, University of Tokyo*
UDSM	University of Dar es Salaam, Tanzania
USNM	U.S. National Museum of Natural History, Washington, D.C.
UZMC	Universitets Zoologiske Museum, Copenhagen
ZMA	Zoologisch Museum, University of Amsterdam
ZMB	Zoologisches Museum, Berlin

*TKO cetacean specimens now at National Science Museum, Tokyo.

RECENT TECHNICAL MEMORANDUMS

Copies of this and other NOAA Technical Memorandums are available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22167. Paper copies vary in price. Microfiche copies cost \$4.50. Recent issues of NOAA Technical Memorandums from the NMFS Southwest Fisheries Center are listed below:

- NOAA-TM-NMFS-SWFC- 79 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1951.
D.A. AMBROSE, R.L. CHARTER, H.G. MOSER and C.R. SANTOS METHOT
(September 1987)
- 80 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1952.
E.M. SANDKNOP, R.L. CHARTER, H.G. MOSER, and J.D. RYAN
(September 1987)
- 81 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1953.
E.G. STEVENS, R.L. CHARTER, H.G. MOSER, and M.S. BUSBY
(September 1987)
- 82 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1954.
B.Y. SUMIDA, R.L. CHARTER, H.G. MOSER, and D.L. SNOW
(September 1987)
- 83 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1955.
D.A. AMBROSE, R.L. CHARTER, H.G. MOSER, and C.R. SANTOS METHOT
(September 1987)
- 84 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1956.
E.G. STEVENS, R.L. CHARTER, H.G. MOSER, and M.S. BUSBY
(September 1987)
- 85 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1957.
B.Y. SUMIDA, R.L. CHARTER, H.G. MOSER, and D.L. SNOW
(September 1987)
- 86 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1958.
E.M. SANDKNOP, R.L. CHARTER, H.G. MOSER, and J.D. RYAN
(September 1987)
- 87 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1959.
E.G. STEVENS, R.L. CHARTER, H.G. MOSER, and M.S. BUSBY
(September 1987)
- 88 Ichthyoplankton and station data for California Cooperative Oceanic Fisheries Investigations survey cruises in 1960.
D.A. AMBROSE, R.L. CHARTER, H.G. MOSER, and C.R. SANTOS METHOT
(September 1987)
